

VR Personality Assessment

What?

VR Personality Assessment consists in the development of a prototypical VR tool as a digital solution for gamified personality assessment in PwC recruiting, focusing on the PwC Global Values.

Why?

To present PwC as a modern and attractive employer, we want to create efficient digital solutions as part of assessment centres. Using personality assessment is one way of realising this.

How?

Traditional and well-validated psychometric tests are converted into VR mini-games with a predefined storyline whose measurements will be matched with the PwC Global Values.

Who?

VR Personality Assessment is an interdisciplinary project. Together with PwC project members, scientists from the Austrian Institute of Technology (AIT) are working on the VR solution.

When?

The tool was developed in the context of an ongoing innovation internship since July 2020. The project will be subject to further development and will be continued in the future.

Your benefits

- Next-level assessment
- Efficient personality assessment of applicants in a gamified VR environment
- Individual adaptation options for your company needs, values and roles
- Valuable experience for the applicant and positive effects on employer branding
- Use of innovative and modern technology

„PwC“ bezeichnet das PwC-Netzwerk und/oder eine oder mehrere seiner Mitgliedsfirmen. Jedes Mitglied dieses Netzwerks ist ein selbstständiges Rechtssubjekt. Weitere Informationen finden Sie unter www.pwc.com/structure.
