Career Opportunities  
for STEM Students

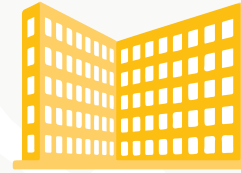

### Cyber Security & Data Privacy

Digital networking brings various strategic and operational possibilities, but also risks and challenges that we need to bear in mind and continually reevaluate. Cyber Security & Data Privacy offers procedural, organisational and IT Compliance consulting for all kind of needs around information security, data security, emergency services and cyber security. Our certified experts focus on creating, reviewing and optimising security concepts. They also develop, implement and manage information security management systems.

### Tax Technology

Increasingly, tax functions understand the value of leveraging technology to drive greater efficiency, improve tax processes and manage risk. We deliver advice on risk management processes, automatise compliance-related activities, adjust systems to the standards set by the financial authorities and implement tax reporting tools.

### Risk Assurance Services

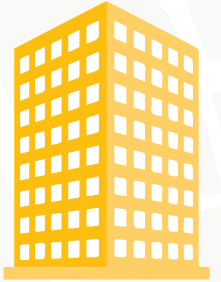

Successful businesses need processes that perform and reliable information systems. Our experts within Risk Assurance Services examine systems and controls, verify their effectiveness and support our clients to further enhance their processes. We collaboratively set up risk management and compliance systems to ensure our clients' readiness to deal with any risks their business may face.

# Technology

### Technology Consulting

Our society lives, works, and plays digitally. Around the clock, we rely on technology's speed, efficiency and convenience. We design, verify and optimise synergies between company strategies, business processes, information systems and controls as well as external reporting. Together, we can make technology happen for our clients' businesses.

### Digital & Innovation

We give purpose to brands, direction to companies and make experiences that define them. We're PwC Digital Services - helping create true business transformation with the power of perspective. Innovation is developed via innovative business model prototyping which focuses on the needs of our customers and which we create together in our Experience Center.

### Forensic Technology Solutions

The Forensic Technology Solutions team analyses electronic evidence with the latest forensic software and equipment. Whether banking fraud, money laundering, account manipulation, procurement and payroll fraud or the theft of confidential information is suspected, our team can draw on a wide range of backgrounds and extensive experience as well as on our global network with over 300 forensic technology professionals to provide our clients with an efficient and effective solution.

### Partner

As a Partner, you strategically lead one or several teams, have managerial responsibility and are internationally well-connected and active. It's ultimately your experience and your ideas that will shape the successful development of the company and inspire future leaders.

### Director

As a Director, you have an important role as a leader of the firm. You make a sustainable contribution to the business by expanding our range of services. Besides growing strong relationships within your network with clients and colleagues, you take on increasing responsibility in business development.

### Senior Manager

As a Senior Manager, you have built on your expertise, and now you are ready to run your own unit at operative level and look after your clients together with your team – both in Austria and beyond. You are also responsible for the development and support of your team members.

### Manager

As a Manager, your core tasks will involve developing your client relationships and leading projects. You'll get to know our clients and know exactly where their needs lie. You keep up-to-date on market developments and take on responsibility for selecting, coaching and developing your team members.

### Senior Associate

This role involves you taking on more responsibility for assignments, having more direct contact with clients, assuming project management tasks and giving younger colleagues guidance. Of course, you'll still have time for further training and professional qualifications!

### Associate

After your studies, you will begin with induction training and networking events and find out about the various office structures. You will come into contact with national and international clients, gaining an initial impression of how different companies function.

### Specialist

Straight after finishing your degree, you'll launch your career in Assurance or Tax & Legal Services gaining professional knowledge on the job. From day one, you will be part of an intercultural team within PwC and will grow your relationships with clients and colleagues. As a specialist, there will be plenty of time for learning and education.
